The soul of stylish vintage combined with old-world charm.

There is something to be said about nostalgia when it comes to vintage trend. Aspiring the trend from another period can be a sort of escape or consolation from contemporary stresses for the people of twenty-first century.

That vintage style keeps 1920s fashions at its core because in many respects, 1920s American society represents the good old days of prosperity. It was a decade of indulgence, rapid economic growth.

The Artisan, premium aluminum casting chafer. The comfort of home served by professionals.

Modular buffet system-Domino

Domino is a completely new concept in modular buffet system. All the Domino components can interlock or stand alone. Simply connect components to build your designed buffet. When tomorrow comes build it again or try something new. Domino is made from food grade 18/10 Stainless steel. Built and design to endure the abuse of a commercial operation. Domino heated components can use caned fuel or electric; domino's easy lock & unlock leg system makes it simple to change height; no tools or complicated instructions; simply insert and twist. The base modules consist of 3 sizes: 25 cm (9.75") square; 35 cm (13.75") square; 62x35 cm (24.25" x 13.75") rectangle. Each base unit is 9 cm (3.50") tall. The unit can simply share legs or the height can be increased by 9 cm (3.50") increments to create beautiful high and low horizon on the buffet scene. To add a leg/height just insert and twist. No tools required. You build it and they will come. **Let your imagination design your Buffet. The system is so simple, a child can do it. Simply put, Domino makes it fun again!**

Induction chafing dishes

The induction chafing dishes from Tiger not only look great, but also are unique in design and effective in cost. This unit can be flush mounted utilizing induction heat, or our electric heater, or canned fuel. The clad bottom distributes heat evenly minimizing hot spots that cause food to stick and burn. The self-closing lid has adjustable patented hinges that will prevent food from getting cold. In addition, the lid can be removed with one hand for easy cleaning. The lid also has air vents that reduce condensation build up that could drip on the food. This condensation is captured by the water recycling system allowing less refilling of the water pan, decreasing labor costs. The handle keeps cool preventing burns. The entire chafer is repairable, making this a quality investment that will last for years to come.

THANKS TO ITS HIGH DENSITY MAGNETIC BOTTOM TIGER CHAFERS ARE THE MOST ENERGY EFFICIENT CHAFERS IN THE MARKET! SAVE ON THE ENERGY COST, CHOOSE SMART!

2. Dripless Waterpan.

3. Fully functional automatic slow-down system.

Roll top chafing dishes

Oblong Roll Top Chafing Dishes are made of solid 18-10 Stainless steel. The structure is sturdy due to 3 mm gauge frames. The lid opens to 90° and 180° for serving versatility and has an auto-braking system to prevent slamming. The lid will roll back to 90° and stop. To continue to 180° simply push the lid beyond the stop. This will help keep food warm more efficiently.

The water control system will decrease labor by recycling the condensation from the lid to the water pan. In addition, the lid can be removed for easy cleaning.

The handle keeps cool preventing burns.

The chafers are repairable, making this a quality investment that will last for years to come.
